COLLECTION

COMMERCIAL UPHOLSTERY

DOLCE

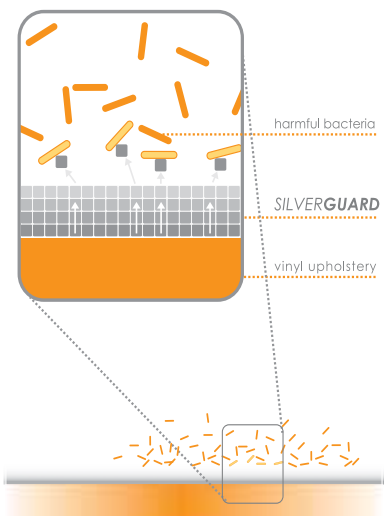

Occasionally a product becomes available that revolutionises the market and sets new standards for performance and functionality. Dolce is proof that technology and product development is alive and well in commercial upholstery.

Dolce is a premium quality fabric designed to withstand the abuse of the harshest commercial environment. With a choice of 28 sophisticated colours and a remarkable 'lambskin-like' feel, Dolce will bring comfort and elegance to any interior.

Dolce is manufactured with a unique water based Polyurethane system which offers exceptional durability. To put the performance in perspective, in a typical abrasion test, Dolce is 5 times more durable than most similar commercial upholstery fabrics and is supported with a market leading 7 year hydrolytic stability warranty.

DOLCE

SilverGuard

Dolce is protected with the exclusive SilverGuard finish to provide a fresh, hygienic surface for commercial upholstery. Based on Silver Ion technology, this highly effective system controls a wide range of odours, stains and bacteria creating a fresh environment.

What is SilverGuard?

SilverGuard is a natural and environmentally friendly Silver Ion additive engineered into the upholstery surface. It has bacteria fighting qualities and inhibits odours and staining.

How does it work?

SilverGuard is highly effective by destroying microorganisms through multiple paths. SilverGuard attacks the bacteria in a technical process and is slowly released from its matrix in the presence of moisture, typically after cleaning. The end result is antibacterial protection for the life of the product.

Is SilverGuard reliable?

SilverGuard has been proven to be effective through its antimicrobial properties. It's safe and efficient process of working through years of service ensures odours will diminish and prevents the promotion of bacteria and mold.

Environment

**The environment. It's where we live.
It's where you live.**

Dolce is manufactured using a water based polyurethane which in itself is environmentally friendly. Dolce contains no formaldehyde and is heavy metal & phthalate free. Due to its exceptional life expectancy, Dolce reduces the need for constant replacement extending the products potential lifecycle. When the time does finally come, there are opportunities for polyurethane to be converted into other useful commodities.

To ensure Dolce leaves the smallest possible footprint on the environment, several steps have been taken to ensure an eco-friendly production process.

The manufacturing facility is equipped with state of the art technology that efficiently makes use of natural resources and almost completely eliminates emissions complying with the most stringent international standards.

Care & Maintenance Guide

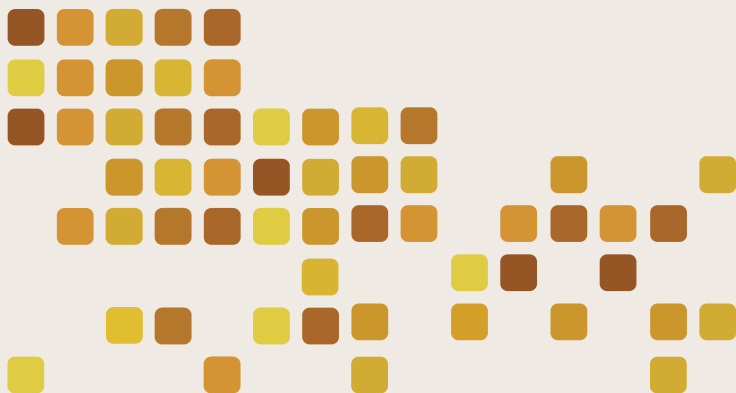

Regular care & maintenance will maximise your products performance and help maintain its original appearance. Dolce contains the unique Silverguard coating which protects the surface and provides a fresh finish.

Regular Maintenance

Clean with warm soapy water and rinse thoroughly with fresh water after cleaning. A solution of 10% household soap and water is recommended.

Heavy Duty Cleaning

For heavy soiling use a commercial grade cleaning solution and water. Rinse thoroughly with fresh water after cleaning.
