

Changing the face of outdoor thread...

SolarFix is a high performance thread designed to be used in outdoor applications. When it comes to textile fabrication, a project is only as good as its weakest link. Time and time again materials have outlasted the thread used to sew them together until now.

The SolarFix experience starts in the workshop with exceptional sew-ability and continues for years resisting degradation when exposed to the most extreme weather conditions.

When it comes to performance and peace of mind, SolarFix is the Solution!

Typical Applications

Awnings

Shade Sails

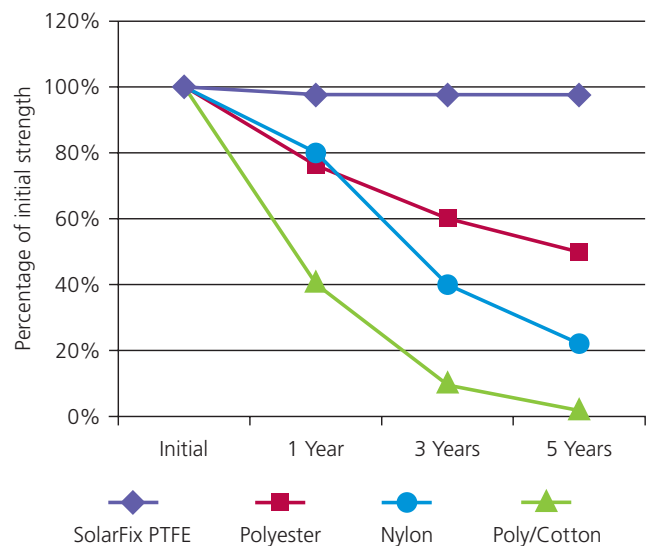

Marine

Product Details

Size	Spool Length	Colours
1500dtex	3400m	Black & Clear
2640dtex	1920m	Black & Clear
3000dtex	1700m	Black & Clear

Why use SolarFix?

SolarFix is a PTFE thread which has exceptional resistance against UV light and chemical attack. The initial strength is maintained over many years of service and SolarFix is supported with a comprehensive warranty.

SolarFix is AY Tech LLC's registered trademark for synthetic fibre, thread and yarn.
