AUTOMOTIVE & MARINE VINYL

The Nolan.UDA range of seating vinyls has been selected for specific marine and automotive applications. Capri and Carbon Fibre marine ranges meet stringent OE requirements and have been proven through many years of service. Roadrunner automotive vinyl has been selected to compliment and match the grain and colours of Australian vehicles.

KEY PRODUCT FEATURES

- ✓ *UV Stabilised*
- ✓ *Abrasion resistant*
- ✓ *Easy maintenance*
- ✓ *Heat sealable*
- ✓ *Mildew resistant*
- ✓ *Colour fast*
- ✓ *Supported by the Nolan.UDA warranty*

CONSUMER GUIDE

For durability, easy maintenance and natural anti-bacterial properties, expanded vinyl is the ideal choice for seating applications. Due to these inherent features it has provided years of success in marine, automotive and commercial applications. Each range has more specific features, therefore careful consideration should be taken to select the right product for each environment. Capri and Carbon Fibre as examples, feature high UV resistance for performance under the harsh Australian sun and are manufactured to comply with stringent marine standards, making them the perfect choice for boat owners. Roadrunner is an automotive quality vinyl and therefore features high abrasion resistance, whilst maintaining a soft handle providing additional comfort for the vehicle's passengers.
