UPHOLSTERY FABRICS AND SUPPLIES

Nolan.UDA

Company Profile

On 3rd August 2009, the trading operations of Nolan O'Rourke and Co. Pty Ltd (trading as Nolan Warehouses) and Upholstering Distributors Australia Pty Ltd were merged into a 50-50 joint venture under the name Nolan.UDA Pty Ltd. Despite its relatively short history, Nolan.UDA has a proud legacy inherited from its parents Nolan O'Rourke and Co Pty Ltd, and Thomas Peacock and Sons Pty Ltd.

Nolan O'Rourke was established in 1920 by William Bernard Nolan, and is still third generation family owned. The company had its beginnings importing Motor Body Parts and Accessories, but over the years, it diversified first into Upholstery and Furnishing Supplies; then into the Industrial Textile and Contract and Commercial market sectors.

Upholstering Distributors Australia Pty Ltd (UDA) is itself a subsidiary of a fourth generation family company, Thomas Peacock and Sons, established in 1881. The principal operations of that group are the manufacture of bedding, and through other subsidiaries, the components of it, including expanded foam and lofted polyester.

The two businesses were well suited to merger. They were of similar size, operated in a like fashion, sold comparable (some identical) products to the same market segments in overlapping geographic areas.

Both were well established, had an excellent reputation and importantly, a high level of mutual respect, mainly because of similarities in their cultures and business approach. They complemented each other well, especially in terms of relative market penetration by both product type and geographic location. Substantial synergies and operational efficiencies have been realised through elimination of duplicate infrastructure and greater economies of scale.

In some market segments, the combined entity is the dominant market player, with all the potential commercial advantages that flow from that position. Our company prides itself on its technical expertise. Our team of sales representatives and customer service staff undertake extensive product and sales training to ensure they can provide the highest level of support and advice possible.

The company is classified a by the Australian Securities and Investments Commission (ASIC) as a 'Large Reporting Entity', satisfying the latter's minimum classification criteria of net assets and turnover. Total staff number eighty-two.

The merger has allowed the company to realise its ambition to become the leading wholesaler of outdoor textiles and related products to the Upholstery, Automotive, Marine, Industrial and Commercial market sectors. The business trades from seven fully stocked branches throughout Australia, located in Sydney (head office), Newcastle, Brisbane, Melbourne, Adelaide, Perth and Darwin.

NolanUDA sales team pictured outside the newly opened Brisbane warehouse in July 2010.

USER INFORMATION

This upholstery catalogue is the fifth module of a series that makes up the master product catalogue of Nolan.UDA. Not all products are relevant to all customers, so the module concept has been developed to allow construction of a composite specific to a particular user need.

This volume is particularly relevant to re-upholsterers, furniture and bedding manufacturers.

Other volumes in the series comprise:-

Volume 1: INDUSTRIAL FABRICS

Volume 2: AUTOMOTIVE & MARINE

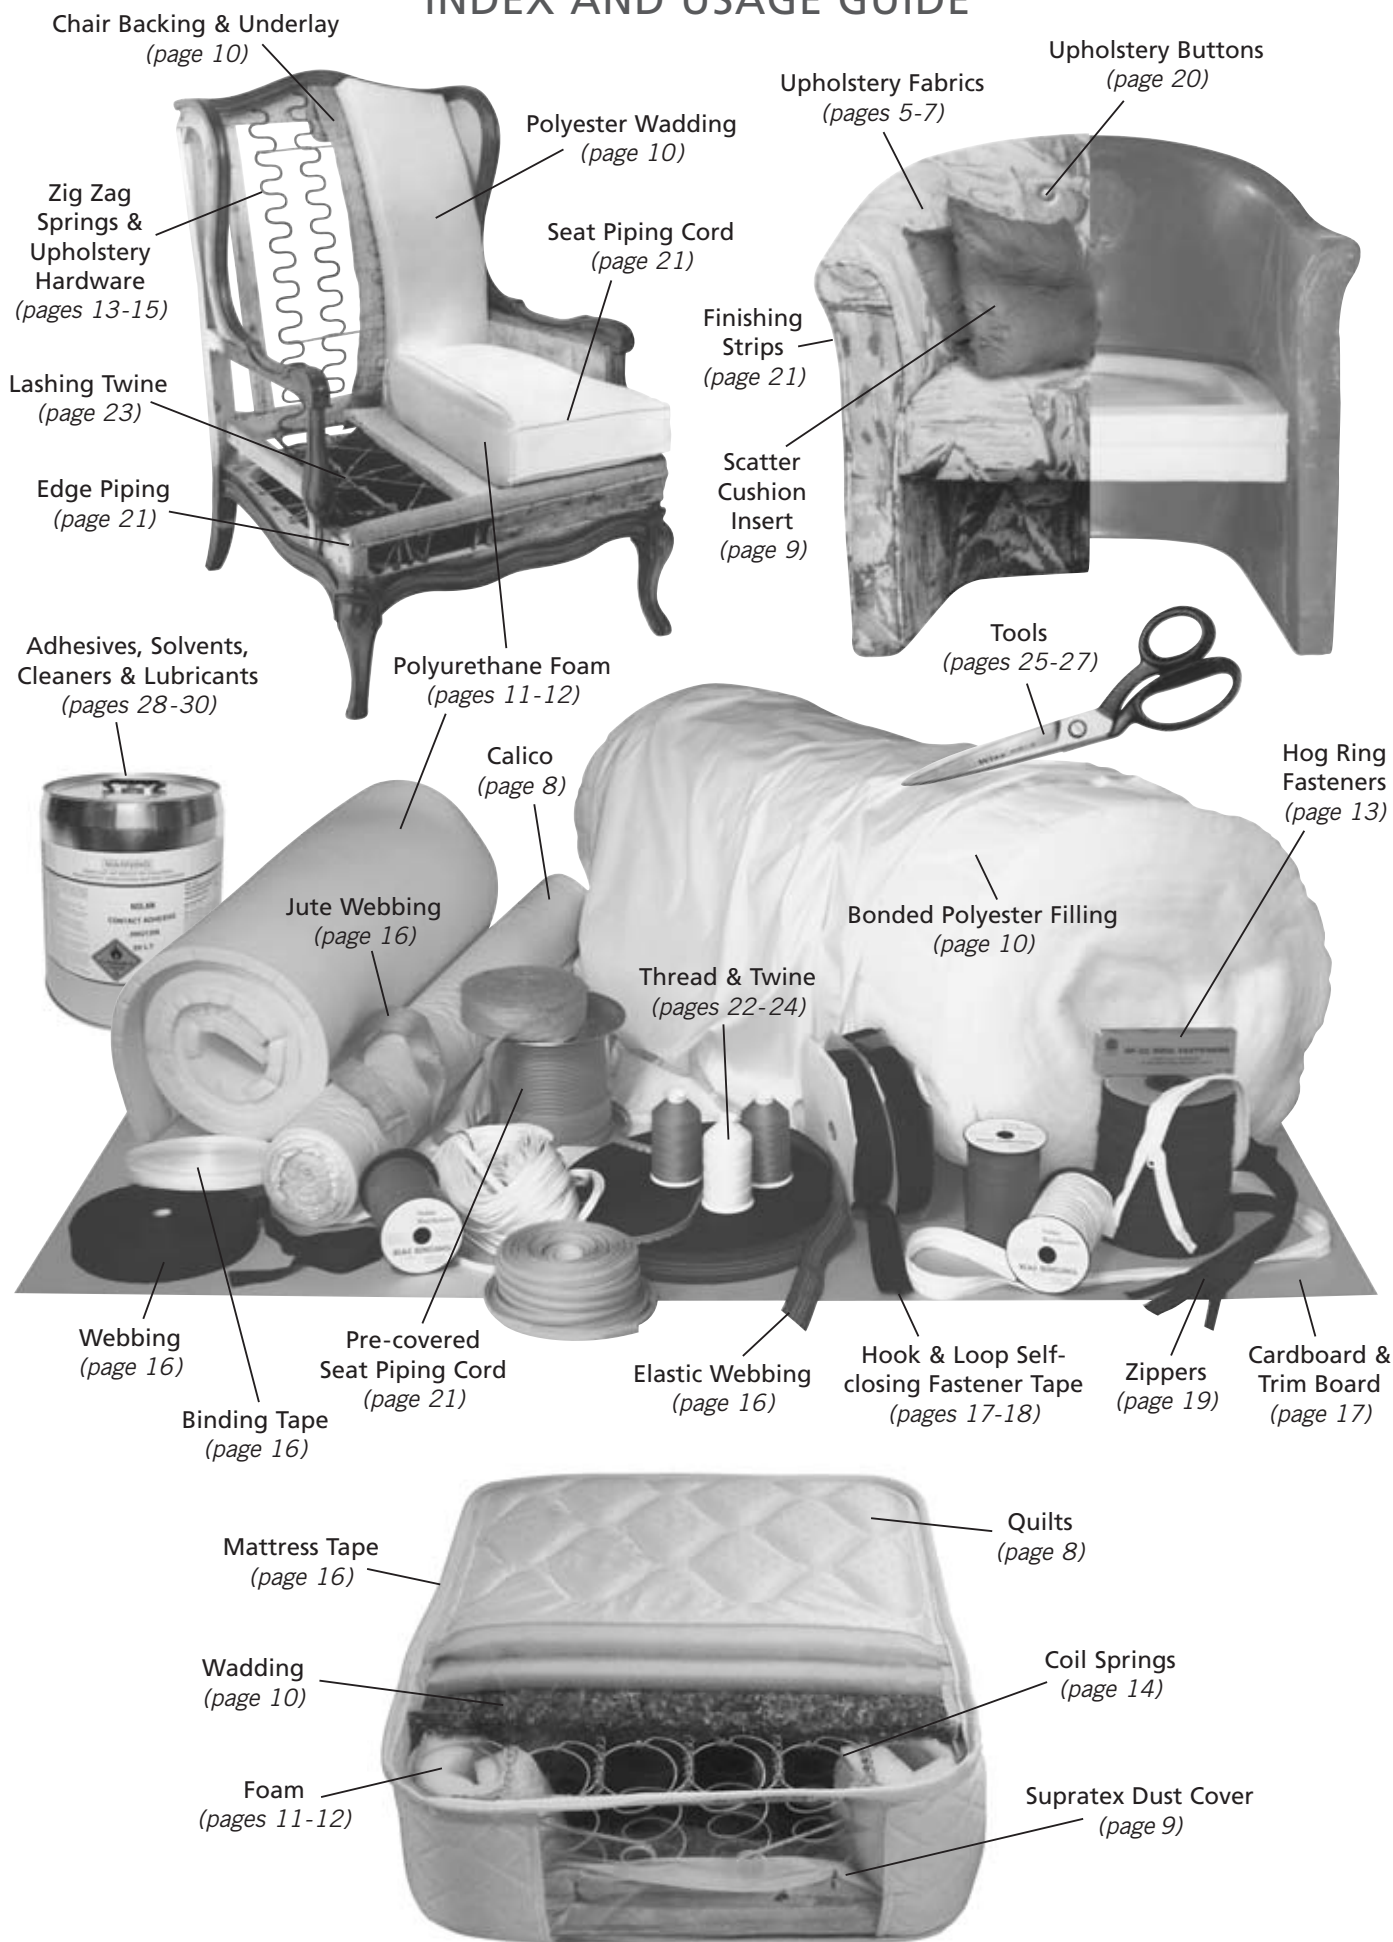

Volume 3: FASTENERS, FITTINGS & ACCESSORIES

Volume 4: CONTRACT & COMMERCIAL

Details of leather, seating upholstery vinyl and hospital mattress ticking can be found in volumes 2 & 4.

Page numbers are listed with the volume number as the prefix
eg V5.3 = Volume 5 page 3

INDEX AND USAGE GUIDE

sunbrella® FURNITURE FABRICS

These beautiful and unbelievably durable fabrics were inspired by the proven performance of Sunbrella acrylic canvas, which has for years been used successfully in marine and awning applications. The outdoor environment is a harsh proving ground for any type of fabric. Not only does it need to be colour fast, stain and mildew resistant; but also easy to clean.

Sunbrella acrylic canvas wins on all counts. Colour fastness is the result of the acrylic yarn being solution dyed, which means the colour is an integral part of it, and not just impregnated into the surface. The surface treatment of the fabric, known as 'proofing', causes water to bead, therefore significantly improving the water penetration resistance. In an outdoor situation, this prevents leakage, but also enhances stain resistance, as it stops water borne contaminants from penetrating the yarn matrix. These are the reasons for Sunbrella's outstanding outdoor performance!

Formal lounge room incorporating Sunbrella fabrics. The seat cushions are completely washable.

"Mason Black" striped fabric, as good as new after two years on a verandah exposed to constant sunlight.

Apply this concept to an upholstery fabric, and you get something quite unique. Of course, Sunbrella furniture fabrics are not waterproofed, because they don't need to be. Nonetheless, the fabric can be used indoors or outdoors without risk. It will not be harmed by ultra-violet light, which can be so damaging to other types of fabrics.

Heavily mildewed fabric restored to almost pristine state after cleaning with diluted bleach and detergent, in accordance with the manufacturer's guide.

Cushion covers made from this fabric can be washed in an ordinary washing machine, if necessary with bleach added. The worst imaginable stains – wine, mustard, rust, mildew, nail polish, suntan lotion, ballpoint pen, etcetera - can all be successfully treated and removed. The fabric does not shrink, and dries remarkably quickly.

With the best will in the world, no family can prevent the attack on furniture covers by sticky fingered grandchildren, lounging adolescents, sports watching pie eaters or negligent party guests! At least with Sunbrella fabrics, despairing mothers can be confident that it just doesn't matter, and get on with the more important business of simply enjoying life. The fabrics are available in a wide choice of patterns and colours, and are supported with a five year warranty against loss of colour or strength from normal use, including exposure to sunlight, mildew and other atmospheric chemicals.

Some of the rich textures and patterns available.

PRODUCT DETAILS:

Weight: 270gsm (8oz/sq yd). Width: 137cm (54ins).
Sunbrella fabrics are available on indent order, either full roll (40 - 60 metres) or cut length. Sample cards are available from your nearest branch.

Key Product Features:

- 100% Solution dyed Acrylic fabric
- Colourfast and UV stable
- Soil and stain resistant
- Fully washable
- Five year warranty

SPRADLING UPHOLSTERY VINYL

Time and time again, after bitter experience flirting with traditional woven fabrics, specifiers return to vinyl for the real down and dirty commercial environments – hospitality and healthcare. From Doctor’s examining tables, to dentist’s chairs, to nursing home and hospital furniture, the three biggest problems are germs, abrasion and stains.

The answer is Spradling vinyl. It is economic, durable and easy to keep clean; but above all is extraordinarily hygienic. Chlorine, widely used in water treatment, is part of the molecular composition of vinyl, which gives it inherent ability to resist the growth of many bacterial organisms. With additional bactericides and fungicides added as standard in the formulation, Spradling’s “Contract Collection” resists the real nasties, such as Staphylococcus and E-coli. Hospital tests have proven it. Further, a range of sophisticated proprietary surface treatments such as “Permablok³”, “Permaguard” and “Silverguard” create yet another protective coating. No more worries about cross-infection and contamination.

Colour guides and product details for our full range of Spradling vinyls can be found in Volume 4, Section 4 of our catalogue, or on our website: www.NolanUDA.com.au

Spradling vinyls are inherently anti-bacterial, a key feature.

VYTEX UPHOLSTERY VINYL

IMPORTANT NOTICE

In 2009, the once great icon of Australian Industry, Nylex Corporation was placed into receivership, which threatened the continuity of supply of its well-known and proven quality furniture vinyl. Fortunately, Nolan.UDA the largest distributor of those vinyls in Australia, procured all the remaining stock, brand names and entered into ongoing contracts with its overseas suppliers. Further, former key technical staff were retained as consultants, for proper oversight of manufacture and quality control.

Therefore, the legacy lives on, and the core proven commercial upholstery brands of that entity – CORDOVA and CAPRI – have been re-launched under the recognisable masthead ‘Vytex’, and will continue to be available as before.

Other Commercial brands, namely Caesia, Designer Twill, Ecoweave and Otway, were scheduled for discontinuance prior to the takeover, but substantial stocks remain. We plan to continue these whilst stocks last, at very attractive pricing.

Vytex upholstery vinyl meets the flammability requirements for upholstery of the Building Code of Australia. Flammability test certificates are available on request.

Vytex Cordova used in a heavy duty commercial application.

VYTEX PRODUCT DETAILS (all available ex-stock):

Cordova: Weight: 670gsm. Width: 137cm. Roll Length: 30m

Capri: Weight: 615gsm. Width: 137cm. Roll Length: 30m

High quality commercial vinyl suited for all hospitality, healthcare and general commercial environments. Capri is also suited for outdoor use.

Key Product Features

- Durable and abrasion resistant
- Easy clean surface
- Soil and stain resistant
- UV stabilised
- Fire retardant
- Two year warranty

USER GUIDE

Selection of Foam and Upholstery Filling

The comfort of a chair depends markedly on the quality of the unseen filling material – polyester/urethane foam and polyester wadding. In both materials, the key factor determining quality is density. In general, the higher the density, the greater the resilience (“bounce”), durability and degree of support. In foam, comfort is also affected by hardness, measured by the force in newtons required to attain a 40% deflection. The choice of the appropriate material depends on the application, but for upholstery seats a high resilient foam of density 31kg/m³ and hardness 190 (i.e. N31-190) is recommended by the manufacturer. For seat backs, a lighter density and hardness (N23-130) is suitable. There is some variation between states due to differences in production output, but these generally are the grades stocked by Nolan.UDA.

USER GUIDE

Spiral Zippers & Slides

"SPIRAL TOOTH"
(Ziplon®) suited to curved shapes.

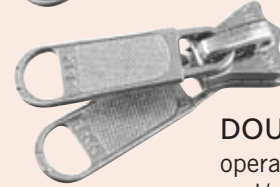

CHAIN WIDTH

Chain width is sometimes referred to in the trade as "number", eg "No.5" would be a Ziplon® of 5mm width.

SINGLE TAB
Operates from front only.

DOUBLE TAB
operates from front and/or rear.

'KLINCH IT'
Tools and fasteners available on indent.
Fasteners in boxes of 5,000.
Part # 170SB 720

USER GUIDE

Adhesives

Adhesives and related solvents are widely and safely used in upholstery, trimming and carpet laying. However, these can be classified as 'hazardous' according to the criteria of the National Occupational Health & Safety Commission (NOHSC) of Australia. It is therefore essential that any risk associated with the use of these functional products is minimised by religiously following the instructions for use, storage and disposal that are printed on every container. In summary, the key points to remember are:-

- Avoid inhalation of fumes, and direct contact of glue with skin and eyes.
- Use only in a well ventilated space; having first eliminated any potential source of ignition.
- Store in a cool, fire isolated space; and dispose of empty containers in accordance with the law and environmental sensitivity.

PRODUCT DETAILS

CONTACT ADHESIVES

				
Product	3M FOAM FAST	3M HI TACK	3M MULTI PURPOSE	3M HIGH STRENGTH
Part #	12ADH AER 3M 74	12ADH AER 3M 76	12ADH AER 3M 77	12ADH AER 3M 90
Details	For bonding foam to foam or other substrate except PVC.	Multi-purpose, quick acting, high temperature resistant.	Quick acting, suited for bonding lightweight materials.	High strength, fast drying suited for polyethylene and polypropylene.
				
Product	3M GENERAL TRIM	3M NEOPRENE	STARSTUK PRESSURE SENSITIVE	STARSTUK CONTACT
Part #	12ADH AER 3M 8088	12ADH AER 3M 80	12ADH AER PB 924	12ADH AER PB 925
Details	Low VOC, clear high strength. Suited for carpet, jute, fabric and most plastics.	Suited for rubber and supported vinyls.	Hi-tack, suited for horizontal inverted surfaces. Suited for fabric and most plastics.	General purpose. Suited for fabric, foam & upholstery and most plastics.
